DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 1 recites the limitation "the bottle cap" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1, 5 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pieper (2,073,170) in view of Hodshon (2,432,015).

The Pieper reference discloses a cleaning system comprising: a bottle 23 for holding a cleaning fluid, a floor cleaning element (pad) 12 for cleaning a desired surface being removably affixed to the bottle 23 by a collar 27 having a bottle attaching portion 31 and a brush securing portion 28 (Figs. 5 -7); and wherein the bottle 23, cleaning element and collar 27 are assembled and secured together, the collar 27 affixes the cleaning element 12 to the bottle 23 to produce an integral fluid dispensing and

scrubbing unit; and the bottle attaching portion 31 of the collar 27 defines first passage sized to securely grasp an outer surface of the bottle cap 32,26, and the brush securing portion 28 of the collar 27 is attached to a handle 11 of the cleaning element 12.

The Pieper reference discloses other different floor cleaning elements can be used. Although the Pieper reference does not specifically disclose a brush, attention is directed to the Hodshon reference which teaches a pad 16 having hair elements constituting a brush.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ a brush cleaning element on the Pierper cleaning system in view of the teaching of Hodshon depending the usage on a suitable floor.

Regarding claim 5, the cleaning system comprises a bottle cap 32,26 for removably covering a spout 25 on the bottle 23, and a nipple 32 formed integrally with the bottle cap 32,26 defining an opening for dispensing a fluid contained in the bottle in a desired location.

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 19 filed on 03/20/2006 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
